Phạm Thanh Lâm

Network Engineer · Computer Networks & Data Communications

UIT graduate with hands-on experience in network security, high-availability infrastructure, and SDN. Focused on building resilient, automated network systems. Seeking a full-time role in network engineering or security operations.

EXPERIENCE

FSI — Công ty Cổ phần Công nghệ FSI
Mar 2026 - Jun 2026

Network & Security Engineer Intern

26/22 Đường số 03, Cư Xá Đô Thành, Phường Bàn Cờ, TP. HCM

- Working on network infrastructure and security systems in a production environment.
- Configuring and maintaining enterprise-grade networking equipment under senior engineer supervision.
- Collaborating on real-world deployment and troubleshooting tasks across client sites.

PROJECTS

HA Firewall & AI-driven SIEM — Thesis (KLTN)
Jan - May 2026

- Built **Active-Passive firewall cluster** (OPNsense + CARP/pfsync) targeting <5s failover with zero packet loss; measured pfsync state-sync overhead against baseline throughput.
- Deployed defense-in-depth: HAProxy Reverse Proxy (SSL Offloading) at edge + **ModSecurity WAF (OWASP CRS)** on backend to benchmark Layer-7 attack interception.
- Built Wazuh SIEM data pipeline; generated custom attack dataset (DVWA + Kali Linux); trained **Random Forest / Logistic Regression** classifier to reduce False Positive rate vs. rule-based detection.
- Target: FP rate reduced from >30% → <15%; evaluated with Precision, Recall, and F1-Score metrics.

OPNsense · CARP/pfsync · HAProxy · ModSecurity · OWASP CRS · Wazuh SIEM · Random Forest · Python · VMware

SDN Server Load Balancer
Oct - Dec 2025

- Designed SDN load balancer using Python, Mininet, and POX Controller (OpenFlow); implemented ARP Spoofing, bidirectional NAT, Round Robin & Random scheduling.
- Integrated **Health Check & automatic Failover**; built real-time traffic monitoring dashboard (Matplotlib).

Python · Mininet · POX/OpenFlow · SDN

Network Monitoring System — LibreNMS
Sep - Nov 2024

- Deployed centralized NMS on Linux/Docker; configured **SNMP v2c/v3** for bandwidth, CPU, RAM collection; set up Email/Telegram alerting pipeline.

LibreNMS · Docker · SNMP v3 · Linux

Enterprise Infrastructure — FSI
2026

- IOS upgrades (Install Mode) + **StackWise** configuration on Cisco Catalyst 9200L in live production.
- Configured **Peplink SpeedFusion Bandwidth Bonding** & Hot Failover for multi-branch WAN resilience.
- Deployed **F-DDH BOX** for C2 communication blocking; fiber optic troubleshooting at Viettel IDC.

Cisco IOS · Peplink SD-WAN · F-DDH BOX · Data Center

EDUCATION

University of Information Technology (UIT – VNU-HCM)

B.Sc. Computer Networks & Data Communications

GPA 7.72 / 10 · 2022 - 2026

Relevant courses:
Network Performance Evaluation · DevOps · Programmable Networks · Systems Programming

SKILLS

NETWORKING

TCP/IP · Routing/Switching · High Availability · CARP / pfsync · SDN / OpenFlow · SD-WAN · Cisco IOS · StackWise

SECURITY

OPNsense · Wazuh SIEM · ModSecurity WAF · HAProxy · Suricata IDS/IPS · LibreNMS · SNMP v2c/v3

SYSTEMS

Linux · VMware · Docker · Windows Server

DEV & TOOLS

Python · Shell Scripting · Git · Mininet · scikit-learn
